WEARABLE

SMARTPHONES

TABLETS

This 360 degree solution leverages its sleek profile to engage users senses in an informative and entertaining experience that leaves lasting impressions on shoppers. A dramatic evolution from the bulky, easily damaged screens, Inform360° provides an interactive, dynamic, and agile product experience.

By combining visual merchandising, security, charging and interactivity, Inform360° is fully equipped to present and sell the product. With gestures as simple as touch or lift, product information and interaction points are projected on any surface, allowing users to learn more about the product. They can explore product features and messaging by touching the projected content which can be remotely uploaded and managed. Adaptable to existing alarm systems, retailers gain peace of mind knowing that their merchandise is safe, while providing an engaging, and memorable product interaction for the shopper.

KEY FEATURES

SURPRISING EFFECT

Luring shoppers in from a distance, Inform360° cultivates curiosity and product discovery
